

Vegetable Parchment

UN COATED VEGETABLE PARCHMENT

Grease Resistance	Release Qualities	Wet Strength	Tear Resistance	Approved for Food Contact	Food Wrapping	Recyclable
😊	😊	😊	😊	😊	😊	😊

Description: Un-coated vegetable parchment is a waterleaf paper, manufactured entirely from vegetable or plant materials processed to provide an increased surface hardness with a high degree of resistance to organic fluids such as fats and oils. It also has excellent wet strength.

Typical End Use: An environmentally friendly reusable food handling paper ideal for food wrapping.

Benefits:

- Heat Resistant
- Suitable for oven use
- Reduces the need for oil or fat
- Reusable
- Reduces the need for washing up.
- Release qualities
- Excellent wet strength

TECHNICAL DATA

Property	Unit	Value	Tolerance	Test Method	Image
Grammage	gsm	45	+/- 5%	STM88	
Thickness	μ	55	+/- 10%	STM44	
Tearing Strength (Elmendorf)	mN	180/200	Min value MD/CD	STM42	
Burst strength	kPA	180	Min value 120	STM41	
Tensile Strength	N/15mm	64	Min MD value 50	STM43	

QUALITY and ENVIRONMENT

- Maintains a clean working environment
- Paper is delivered in sheets or reels
- Reams can be supplied in polywrap, brown Kraft or cartons
- Biodegradable and compostable.
- For use in ovens up to 210° C
- All natural raw materials
- All relevant certification available on request
- More technical information available on request

Since the end use of the paper is beyond our direct control, we expect that the customer will satisfy themselves that the paper is suitable for that end use. Unless otherwise negotiated, we reserve the right to use raw materials from more than one source whilst still maintaining a commercial match within the terms of this specification.
